MK

SUMMARY

Python and Django Developer with hands-on experience in backend development, REST API design, and PostgreSQL database management. Builds web applications and backend features with a focus on clean code, reliable frontend-backend integration, and practical development workflows.

EXPERIENCE

Python Developer

AppUnik

Jan 2026 – Present Ahmedabad, India

A tech firm delivering enterprise web solutions

- Designed and implemented REST APIs with Python and Django for core business workflows and frontend integrations.
- Designed PostgreSQL schemas and data relationships for storage, processing, and application workflows.
- Implemented backend features for user data management and API integrations.
- Kept frontend-backend communication reliable through structured, documented API contracts.

Backend Intern

AppUnik

Sep 2025 – Dec 2025 Ahmedabad, India

A tech firm delivering enterprise web solutions

- Wrote PostgreSQL queries and worked on schema changes for application data.
- Used Git and GitHub for feature branches, commits, and pull requests. Followed main vs development branch workflows on live project code.
- Configured environments with .env files so credentials stay out of source.

Software Intern

Qspider

Mar 2025 – Sep 2025 Ahmedabad, India

Internship focused on Python, SQL, Django, Manual Testing

- Practiced Python problem-solving for backend-oriented tasks. Wrote SQL for retrieval and updates across relational tables.
- Learned manual testing: test cases, testing types, and SDLC / STLC.

EDUCATION

Master of Computer Applications (MCA)

Rajiv Gandhi Proudlyogiki Vishwavidyalaya

Jul 2023 – May 2025 Bhopal

Bachelor of Science (BSc)

Barkatullah University

Jul 2020 – May 2023 Bhopal

SKILLS

Backend

Python Django REST APIs

Django REST Framework

Database

PostgreSQL SQL RDBMS

Frontend

HTML CSS JavaScript React

Tools

Git GitHub

Testing

Manual Testing SDLC STLC

PROJECTS

Flowcreator

Nov 2025 – Feb 2026 Ahmedabad, India

AI-powered social content SaaS

- Built Django backend APIs and workflows for caption and image generation, scheduling, and publishing.
- Implemented caption generation with prompt enhancement and tone selection, plus image generation from user inputs.
- Established role-based access control and subscription billing on a SaaS architecture.

Meditation App

Mar 2026 Ahmedabad, India

A meditation app for user management and session tracking

- Built Django REST Framework APIs over PostgreSQL for users, sessions, completion tracking, and activity updates.
- Documented APIs so the frontend can rely on a stable contract.
